

PAC Attachment Download Probe

Edge iOS — inline rendering versus attachment download

Visual success check

If you can read this, PDF rendering/opening succeeded.

The inline and attachment endpoints serve these exact same bytes.

Fixture identity

Fixture ID: PAC-PDF-2026-08-26-A

Device build: ef83b924-a685-4a9b-a6d3-36fddcb03386

Expected behavior

1. Inline endpoint: no Content-Disposition header; Edge should render this page.
2. Attachment endpoint: Content-Disposition: attachment; Edge should download it.
3. Open the downloaded file and confirm this Fixture ID is unchanged.

Static one-page fixture; no forms, scripts, external resources, or private data.
